## INTRODUCTION

This report presents final figures relating to the use of farm land, and a classification of all census farms by size.

Similar data for commercial farms (defined as farms with sales of agricultural products during the previous 12 months of \$1,200 or more) will be tabulated and published later.

### Definition of a Farm

For census purposes, a farm is defined as a holding of one acre or more with sales of agricultural products during the past twelve months valued at \$50 or more. This definition is more restrictive than that used in 1956 or 1951 and part of the intercensal changes in number and area of census farms as shown in this report are a result of the change in farm definition. The 1961 Census of Agriculture Bulletin SA-2, "Number and Area of Census Farms for Counties and Census Divisions" (Catalogue No. 96-525) includes a table which gives the number and area of holdings not classified as farms in 1961 due to the change in farm definition between 1956 and 1961.

### Improved Land

This is the total of the area under crops, improved pasture, summer fallow, and other improved land.

### Area Under Crops

Included in this figure is the total area of field crops, fruits, vegetables, nursery and greenhouse products.

### Improved Pasture

All land which has been cultivated and seeded to pasture and was being used for grazing purposes is included in this item. Enumerators were instructed **not** to include as improved pasture, natural prairie or hay land that was pastured after hay was cut in 1961.

### Summer Fallow

Enumerators were instructed to include in this item land from which no crop was to be harvested during 1961 but which was to be cultivated or worked during the year for weed control and/or moisture conservation. Areas which were sown to a crop with the intention of ploughing under as green manure were enumerated as summer fallow, but land ploughed in the summer after a crop, such as hay or fall rye had been removed, was to be enumerated as cropland.

There are indications that in some areas the enumerator may have erroneously included summer or fall ploughing and idle land as summer fallow.

Le présent rapport donne les chiffres définitifs sur l'utilisation de la terre agricole et le classement de toutes les fermes du recensement suivant leur grandeur.

Les données correspondantes relativement aux fermes commerciales (dont les ventes de produits agricoles durant les 12 derniers mois ont atteint \$1,200 ou plus) seront totalisées et publiées plus tard.

### Définition de la ferme

Aux termes du recensement, une ferme est un lopin de terre d'une acre ou plus et dont les ventes de produits agricoles au cours des 12 derniers mois ont atteint \$50 ou plus. Cette définition est plus restrictive que celle qui a servi aux recensements de 1956 et de 1951 et la variation intercensale du nombre et de la superficie des fermes tient partiellement à la nouvelle définition. Le bulletin SA-2 du recensement de l'agriculture de 1961 "Nombre et superficie des fermes de recensement, comtés et divisions de recensement" (n° de catalogue 96-525) comporte un tableau qui donne le nombre et la superficie des terres non classées comme fermes en 1961 par suite du changement de définition entre 1956 et 1961.

### Terre défrichée

Superficie totale des terres mises en culture, des pâturages défrichés, des jachères et autres terres défrichées.

### Terre en culture

Superficie totale des grandes cultures, des cultures de fruits, de légumes, des produits de serre et de pépinière.

### Pâturage défriché

Toute terre qui a été cultivée et ensemencée en pâturage et a servi au pacage. Les agents recenseurs avaient été avertis de **ne pas** inclure les prairies naturelles ni les terres à foin qui avaient servi de pâturage après la fenaison de 1961.

### Jachères

Les agents recenseurs devaient inclure sous cette rubrique la terre qui n'avait pas servi aux cultures en 1961 mais qui devait être labourée durant l'année pour enrayer les mauvaises herbes ou conserver l'humidité. Les superficies ensemencées d'une certaine culture et retournées ensuite comme engrais vert sont classées comme jachères, mais la terre labourée durant l'été après une récolte (foin ou seigle d'automne) doit être classée comme terre en culture.

Il semble qu'en certains endroits, les agents recenseurs aient inclus par erreur des labours d'été ou d'automne et des terres incultes avec les jachères.

**Other Improved Land**

This item includes the area of barnyards, home gardens, lanes and roads on farms. It also includes farm land that has been cultivated at one time but which was not being pastured, or summerfallowed. Areas of new breaking that had not yet been cropped were also classified as "other improved land".

**Woodland**

Farm woodlots, private land leased from others for wood cutting, sugar bush and cutover land with seedlings or trees which have or will have value as timber, fuelwood or Christmas trees, were included as woodland. The area of trees planted for windbreaks is also included. Large timber tracts run as a business separately from the farm, and which are leased or under permit solely for cutting of forest products, are not included.

**Other Unimproved Land**

Areas of natural pasture or hay land that had not been cultivated, brush pasture, grazing or wasteland, sloughs, marsh and rocky land, etc., are all included in this item.

**Conversion of "Arpents" to "Acres"**

In certain sections of the Province of Quebec, the land measure is the arpent and enumerators reported land areas in this unit. The conversion to acres was made in the Dominion Bureau of Statistics, using the factor, 1,000 arpents equal 845 acres.

**Autre terre défrichée**

Superficie des basses-cours, des jardins potagers, des routes et des sentiers des fermes, ainsi que la terre qui a été cultivée un certain temps mais qui n'a pas servi de pâturage ni de jachère. La superficie des nouveaux labours non encore ensemencés était aussi classée comme "autre terre défrichée".

**Terre à bois**

Superficie des boisés de ferme, des terres privées louées d'autrui pour la coupe du bois, des sucreries et des déboisés qui ont ou auront de la valeur comme bois d'oeuvre, de chauffage ou arbres de Noël. La superficie des arbres plantés comme brise-vent est également incluse. Ne sont pas compris les grands lots boisés exploités sur un pied commercial indépendamment de la ferme et à l'égard desquels on obtenait un bail ou un permis exclusivement en vue de la coupe de produits forestiers.

**Autre terre non défrichée**

Superficie des pâturages ou terres à foin naturels, des broussailles, des terres incultes ou à pacage, des marais, marécages ou terrains rocailleux, etc.

**Conversion des "arpents" en "acres"**

Dans certaines parties de la province de Québec, la terre se mesure en "arpents" et les agents recenseurs ont inscrit la superficie suivant cette unité. La conversion en acres s'est faite au Bureau fédéral de la statistique, à raison de 1,000 arpents pour 845 acres.

<sup>1</sup> Les chiffres de la superficie des terres ont été révisés depuis le recensement de 1951. Les superficies totales des terres des divisions de recensement, qui n'ont pas été révisées, ne concordent pas avec le total provincial.

<sup>2</sup> Comprend la terre à grande culture, à légumes, à fruits et à pépinières.
